Subject: Microsoft Settlement

I'm not at all satisfied with the Microsoft settlement. It is so terrible that it makes me feel that my government is corrupt.

The idea of allowing them to send their software to schools as "punishment" is a joke. Everybody knows that will only help them with their market penetration.

Further, it does nothing to prevent them from continuing to use their OS monopoly to gain success in other markets.

I voted for Bush. I will not do it again if this goes through.
